Massachusetts Educational Exhibit.

LIBERAL ARTS BUILDING,
SOUTH GALLERY, SECTION K, COLUMN O.

The Massachusetts Educational Exhibit is situated in the south gallery of the Manufactures and Liberal Arts Building, nearly in the centre. Its arrangement is shown in the accompanying diagram:

There are eight rooms, or alcoves, as follows: *A*, Kindergarten; *B*, Primary Schools; *C*, Grammar Schools; *D*, Manual Training and Sewing; *E*, Primary and Grammar Schools (overflow); *F*, High Schools; *G*, Board of Education; *H*, Normal Schools. The *H* in the centre signifies a case of casts from the State Normal Art School. A portion of the alcove marked *H* is devoted to school architecture.

Begin with *A*. The tables contain kindergarten gifts and materials. The walls are covered with the work of pupils. But the walls and tables are not sufficient to contain all the material contributed or all that ought to be shown. Portfolios are filled with the overflow, and these are arranged in a case, ready for easy reference and study.

In the primary room the wall display shows the State course in drawing, selections from the Springfield primary course, Mrs. Cutler's Boston course in form and color, specimen pages from the bound volumes, and Superintendent Davis's presentation of his method of teaching reading. A portfolio case contains additional work.

The show cases are filled with clay work; the shelves contain pupils' work in number, form, color, language, and nature study, with pictures of pupils and teachers engaged in their work.

Room *C* is devoted to the work of grammar schools. The general arrangement is similar to that of the primary room. Drawing in great variety, methodically arranged, is placed upon the walls; the bookcases contain the bound volumes of pupils' work; and the show cases contain a great variety of material used by teachers for purposes of instruction, or made by pupils in the course of their school work. Here are clay work and collections of seeds, minerals, woods, and flowers. Here, too, are

methods of teaching, with illustrations and suggestions as to plans, schemes, devices, and desirable results.

In the next alcove, marked *D*, the manual training is massed. A portion of this work overflows, and is placed on the side of the main aisle between *A* and *F*. Sewing is placed in this alcove, and both the courses of study and the completed garments are worthy of the attention of visitors. A portion of the sewing has been crowded out by lack of space and is found in the high school room.

Room *E* contains drawing crowded out of *C*. Here is shown the complete elementary course in drawing in the city of Boston.

The high school department is in the room marked *F*. The walls give the State course in high school drawing, with illustrations from many of the cities and towns of the State. Here, too, is the Boston high school course. A wing frame in the centre of the room contains the courses of study in drawing of several cities, and sample pages from bound volumes. By giving prominence to specimen pages of the volumes, we hope to attract visitors to an examination of the books themselves.

In the high school room also, in the bound volumes, illustrations of the work of the State in all branches of secondary education will be found.

In room *H* is the work of the State normal schools: photographs of buildings and classes, methods of teaching portrayed graphically, courses of study presented in diagrams and charts, apparatus devised by normal school teachers, "home-made" apparatus made by normal school pupils, and drawing. In room *H* will also be found a department of school architecture.

In room *G* is put the exhibit of the State Board of Education, with pamphlets for distribution, albums of photographs, and the choicest bound volumes. An es-

sential portion of the exhibit of the Board consists of two large maps, one giving a view of the free public libraries of the State, the other showing by a system of dots the number of schools in the State, and a great amount of other statistics. These hang by the broad aisle.

The work of the free evening drawing schools is shown on the walls by the main aisle.

NOTE:—Nos. 1501 to 1599 inclusive are in the winged frame in the Normal School Department.

Nos. 1501 to 1522 inclusive illustrate the course of study in the Boston Evening Drawing Schools.

Nos. 1523 to 1539 inclusive contain sample pages from the bound volumes of pupils' work from the Primary and Grammar Schools of Boston. These numbers, therefore, constitute an index to these volumes, and are interesting for their own sake, because they show so vividly the development of the pupils from year to year.

Nos. 1541 to 1561 inclusive contain illustrations of the public school course in drawing in the Normal Art School.

Nos. 1562 to 1575 inclusive illustrate the course in Mechanical Drawing in the Primary and Grammar Schools of Springfield.

Nos. 1576 to 1584 inclusive contain sample pages from the bound volumes of pupils' work from the Primary and Grammar Schools of Springfield.

Nos. 1585 to 1590 inclusive contain photographs and work of the Public Schools of Worcester.

Nos. 1591 to 1599 inclusive contain illustrations of the course of study in the Boston Evening Drawing Schools.

NOTE:—Nos. 1600 to 1612 inclusive are in a portfolio case in the Board of Education Department.
